outside the money."

A lease at \$1 an acre down the line of the Ouachita river and the Bayou Riarcon between Farmersville and Monroe looks as good as the Rull hayou and the only question is "Will oil be found along that winding stream?" It looks as though it were worth a dollar an acre as a gamble

but not more.
This is not the first time Lous This is not the first time Lousiana has been the center of an oil
boom and many have been sadly dis
appointed who undertook to make
a fortune there. As an instance of
how one sure thing went wrong and
it was when the boys drilled for gas
at Alexandria and got dusters on
both sides of the river and could see
from the derrice? Shorts the gas bubbling up from the river.
It is a country rich in promise but
poor in fulfillment. It is just a liftile better to slick around home and
play the new pools in Oklahoma that
are being uncovered every day.
The game on the other side of the
Red river is too big for the average

Red river is too big for the average

Kansas Offers Many Possibilities.

Kansas is living up to the theory that a tread can be followed successfully by its new pools all of which line up with some of the old stuff with just enough exceptions to make the rule good.

The latest and most interesting development is in Chautauqua county where the Guffey and Gillespie people have \$200-barrel well, No. 1, D. 8. McAlister farm 4n the northeast of 28-32-10. The location is seven miles north and seven miles west of Sedan and is remote from any production, the nearest being the deep gas well owned by the Guffey people in 24-32-10. In this new test the top of the sand was found at 1,388 feet and drilled to 2,018 feet. It is said that credit is 2.018 feet. It is said that credit is

due to Guffey and Gillespie's geologist. Edward McCreary and his assistant Noah Adams.

The Guffey and Gillespie people are real oil producers and will do much toward building up interest in

are real oil producers and will do much toward building up interest in that part of the state.

Down northeast of Douglas where the country has only recently been properly explored, there is another deep sand well in the northeast corner of the southwest of 30-29-6 at 2.744 feet, where the National Refining company has evidently picked out a likely looking spot and has demonstrated that under the management of Fred King, old timer in the oil game, they can find oil with great regularity. It will be remembered that a deep test was uncovered by Vaniman and Davidson in 26-29-5 good for 200 barrels.

The National Hefining company has been the luckiest of the lucky in the Elbing peel which now is by all means the liveliest spot on the map so far as Kansas is concerned and has not as yet reached its full development as rigs are going up by the sogge. It offers a good place for the oil men to play the game as there can be no more interesting proposition than picking out the control of the control that and the control of the control

Raynster

proposition than picking out the trend at both ends of the great de-velopment that has made Kansas

. Late News From Ardmore.

ARDMORE Nov 28 -The new from the territory southeast of the discovery well at Hewlit is not favor-able, and the reports from that dis-trict are far from being encouraging.

For Your Protection

Wear a "Ranchkote"-it gives positive protection against all kinds of rough weather. It bears the Raynster Label—which is a further protection. It insures positive value.

The "Ranchkote" is designed for "outdoor" people, -oilmen, farmers, ranchmen, truckmen, etc. A weatherproof garment for long, hard service,—a "knock-about" coat.

It is made by the largest rubber manufacturer in the world— The United States Rubber Company. It is sold under their seal,—the Honor Mark of unquestionable quality.

The fabric is as double texture weatherproof jean in khaki, brown or drab, interlined with the best rubber. Full corduroy collar, double jacket over front, back and shoulders.

eyelets. A coat that is usable, practical and-dependable.

With extra arm reinforcements, two outside pockets, storm
